ORWAK COMPACTOR 5030 MARINE

For easy packing of waste on board ships

A sack is fitted to the drum when raised.

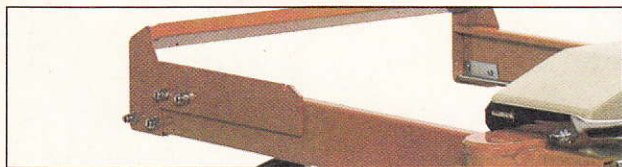

Waste, including fins, paper and wet rubbish, is placed inside the drum. The compactor minimizes the volume of the waste.

The 5030-Marine is designed to handle general waste on board ships. You can choose from a round or square drum in various sizes and many options can be fitted to the compactor to suit all requirements.

Telescopic cylinder for minimum height.

Locking mechanism for press unit in rear position.

Skid mounting.

The process is repeated until bag is full, leaving a neat, easy to handle, hygienic package.

Technical Data

Loading aperture:	Ø 500 mm
Press force:	3 tons
Cycle time:	30 sec.
Piston stroke:	690 mm
Electrical data:	single phase, 100/110/230 V 50/60 Hz, alt. 3 Phase, 200-440 V 50/60 Hz, 0.75 kW
Protection class:	IP 65
Weight:	310 kgs
Length:	980 mm
Width:	780 mm
Height working pos.	1470 mm
Height emptying pos.	2040 mm
